

COVID-19

The sample taken from your airways shows that you are infected with the new COVID-19 coronavirus.

Symptoms of COVID-19

Typical symptoms include fever, sore throat, headache, muscle aches, coughing and difficulty breathing.

Treatment

If you have mild symptoms of COVID-19

If your condition is not serious and you do not need to stay in hospital, you will be sent home. Follow the instructions under 'When you return home'.

While you are in hospital, we will assess whether further examination is necessary

While you are in hospital, we can provide assistive treatment such as oxygen and antibiotics

In rare cases, ventilator treatment may be required

You will remain in isolation during your time in hospital

Your usual medication

As a rule, you will receive your regular medication from the staff.

Speak to the staff if you take special medication.

In the days ahead

Contact your doctor or the Emergency Doctor Service if your condition worsens

For example, if you experience chest pain, renewed fever or increasing shortness of breath.
